

ABSTRACT

At the periphery of a joint surface (11) formed of hard material (1) and hard material (2) of an upper case (12) and a lower case (13), a waterproof rib (7) formed of soft material and an waterproof groove (8) formed of soft material opposed to the rib are provided integrally with the hard material (1) and the hard material (2), respectively. Further, soft materials (9) and (28) that protrude more than the hard materials (1) and (2) are formed on the surfaces of the upper and lower cases (12) and (13).
